

Dr. Audino is a chemist/chemometrician and independent consultant to chemical and biological laboratories. On behalf of Accreditation Bodies, she assesses laboratories to and is an instructor for multiple ISO/IEC standards such as ISO 17025. She is highly visible in the cannabis industry as a leader for the development of official and consensus test methods, and member of expert review panels. She also serves as scientific advisor to multiple cannabis testing laboratories, private and non-profit cannabis organizations, and state regulatory bodies. Dr. Audino has chaired the AOAC cannabis advisory panel and analytical cannabis working groups, was a member of the NCIA Guide for Laboratory Testing, is a faculty member of Teachable Medicine, and has been an invited speaker at many domestic and international conferences.
